DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35U.S.C. 121:
- I. Claims 1-26, drawn to the method and product for risk stratifying of potential chronic pain patients in a population by selecting direct, indirect and non-medical variables, creating a pain model using the variables, applying the model to the patient(s) to create patient mathematical expression, classifying potential patient according to risk by a comparing the equation with objectives, and for categorizing the patient based on the relationships between the patient mathematical expression and the categorization preferences that specify the characteristic of the forecast, classified in 705/2.
- II. Claims 27-28, drawn to method for sensitivity analysis of a model for reducing error in identifying patients by applying an error assessment model to a patient error list, and by applying a sensitive analysis model to weighted variables, selecting weighted variable changes and modifying weighted variables, classified in 705/7.
- 2. The invention are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility as method and product for risk classification of chronic pain patients for clinical trial or medical diagnosis and treatment, invention II has separate utility such as sensitivity analysis of a pain model for optimization. See MPEP § 806.05(d).

Page 3

Application/Control Number: 09/844,234

Art Unit: 3626

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required or group II, restriction for examination as indicated is proper.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kim T. Bui whose telephone number is 571-272-6768. The examiner can normally be reached on Monday-Friday from 8:30A.M. to 5:00P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Thomas can be reached on 571-272-6776. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
